

CAREER OPPORTUNITY WITH SILVER FERN HEALTHCARE

Title: Clinical Consultant (Independent Contractor)

Position Description

Silver Fern is seeking dietitians, nurses, and nurse practitioners with senior-level clinical experience in the areas of **heart failure**, **hypertension**, and **renal disease** to consult on the development of unique products that address behavior and psychosocial barriers to patients' self-management of their disease.

Clinical consultants are essential members of Silver Fern's patient-centered clinical content and product development team. Led by the Director, Clinical Training and Content, Clinical Consultants contribute to the development of clinical content for all Silver Fern products, including module assessments, clinical suggestions, clinical rationale manuals, and training.

About Silver Fern Healthcare

Based in Connecticut and founded in 2013, Silver Fern Healthcare is an early-stage company working to reverse the chronic-disease epidemic in the United States. Driven by a mission to transform care for people with chronic diseases, Silver Fern's scientific, evidence-based SaaS products and accompanying services provide healthcare professionals with tools and insights to improve the care—and the lives—of patients with chronic disease. Silver Fern works with a wide variety of healthcare stakeholders to provide products that address the human and financial challenges of treating chronic disease.

Responsibilities

- Contributes to the writing of research-based, practical behavior and psychosocial assessments, clinical suggestions, patient education, and related training content and manuals in targeted chronic disease states
- Writes and/or reviews clinical content for communications, sales, and marketing materials, such as Power Points and brochures
- Keeps up to date with healthcare industry trends as well as trends and development in the treatment of chronic diseases
- Recommends opportunities to develop new products or sell additional services and products to clients
- Utilizes technology systems and platforms to work collaboratively with the clinical content team
- Serves as an advisor to the team regarding research and care delivery for the chronic disease(s) for which the consultant has expertise/experience
- May be asked to support training or education activities

Desired Skills and Attributes

- Highly flexible and adaptive work style, with the ability to manage time and work on multiple projects simultaneously
- Strong writing skills

- Proficient with Microsoft Word and Excel
- Able to work collaboratively and efficiently on cloud-based platforms, such as Microsoft OneDrive and Microsoft Teams. Basic training will be provided if a candidate has experience with other collaborative, cloud-based platforms.

Education and Experience Required

- Excellent understanding of lifestyle and medical management of disease process including the latest therapeutic interventions
- Experience using psychosocial approaches to behavior change
- Registered nurse, registered dietitian, or nurse practitioner
- 5+ years' clinical experience in renal disease, hypertension, and/or heart failure
- 2+ years' experience in clinical research and/or administration
- Master's level training preferred

Travel

- Minimal travel; work is performed remotely
